## Data "shepard"

-  Norway, Oslo
-  luigi-maglanoc.com
-  LAMaglan
-  luigi\_maglanoc@hotmail.com
-  luigi-angelo-maglanoc

### Software skills

- R
- Python, Git(hub), Linux
- FastAPI
- containers (podman, docker)
- databases (sqlite, postgres)
- Frontend (React.js)
- container orchestration (OKD, helm)
- NGINX, apache HTTP server
- Github Actions

### Languages

- English
- Norwegian
- German

### About me

Luigi Maglanoc is a data “shepard” at the IT Department of University of Oslo. Background in psychology and clinical neuroimaging. Currently interested in anything to do with Python, especially RESTful APIs (FastAPI). Wanting to learn more devops, such as containers (docker/podman), container orchestration (kubernetes/openshift), and CI/CD (github actions). Trying to learn some simple frontend with React.js.

### Work experience

- 2020 - **Senior Engineer** University of Oslo  
Building end-to-end data pipelines in R and python. Deploying applications (e.g. R shiny apps) on UiO IT infrastructure (servers, OKD). Advising and assisting UiO (affiliated) researchers on data management, processing and analyses, as well as use of statistical software (mainly R)
- 2019 **Senior Advisor** Norwegian Tax Administration  
Created statistical reports in various projects. Wrote SQL code to extract data from inhouse data warehouses to be used in fraud detection. Started creating an unsupervised model (topic modelling) to extract themes that may better describe different categories of working industries.
- 2015 - 2019 **PhD (Research fellow), Clinical neuroscience** University of Oslo  
My doctoral research mainly revolved around elucidating depression heterogeneity and identifying biomarkers using advanced brain imaging methods, clinical and genetic data, working with international researchers. In later projects, I used machine learning applications in big data, as well as a wide range of multivariate statistics. I have also been involved in writing and data analysis of several external projects. In addition, I taught introduction courses in research methods at bachelor and master level.
- 2011 - 2015 **Research assistant** Several institutions in Norway and England

### Education

- 2011 - 2013 **MSc, Cognitive Neuroscience** University of Oslo  
Master’s thesis title: Brain networks in bipolar disorder II: A resting-state fMRI study
- 2008 - 2011 **BSc, Psychology** University of Oslo  
Major in cognitive psychology, minor in pedagogical science

### Volunteer work

- 2020 Activity leader for children and teenagers, AIESEC
- 2010 Activity leader for teenagers, Save the Children
